Built around how a business actually works

VyapaarGo connects customer-facing commerce with counter operations, stock, purchasing, accounts and fulfilment. The specification documents 42 connected modules across the complete operating cycle.

Customer journey - from discovery to delivery

01 Discover Search product, SKU, brand, category or colour.	02 Order Select variant, cart and checkout.	03 Accept Team checks stock and confirms quantity.	04 Bill GST, payment and ledger are recorded.	05 Pack Create boxes and print labels.	06 Deliver Dispatch and customer tracking.
---	---	--	---	--	--

Who uses it?

Administrator Full operational control, analytics, staff, settings and audit review.	Staff Role-based billing, orders, stock, purchase, payment and distribution work.	Customer Prices after login, cart, orders, documents, payments, ledger and tracking.	Guest Browse/search catalogue with price-protected access.
--	---	--	--

42 documented modules. One organised application.

The modules are grouped below so buyers can quickly understand the functional coverage without reading a technical specification.

01-07 Commerce & Customer Experience

- Roles & access
- Public storefront
- Product search & variants
- Product details
- Customer security
- Cart & checkout
- Customer self-service

08-14 Administration & Catalogue

- Admin dashboard
- Global navigation & search
- Categories
- Brands
- Product catalogue
- Camera, image & crop
- Excel product import

15-21 Sales & Customer Accounts

- Inventory & stock
- Online orders
- Sales billing
- Invoice records & printing
- Customers
- Customer ledger
- Receipts & payments

22-28 Supply & Fulfilment

- Suppliers
- Supplier ledger
- Purchase orders
- Supplier payments
- Packaging unit
- Box stickers & labels
- Transport & dispatch

29-35 Finance & Workforce

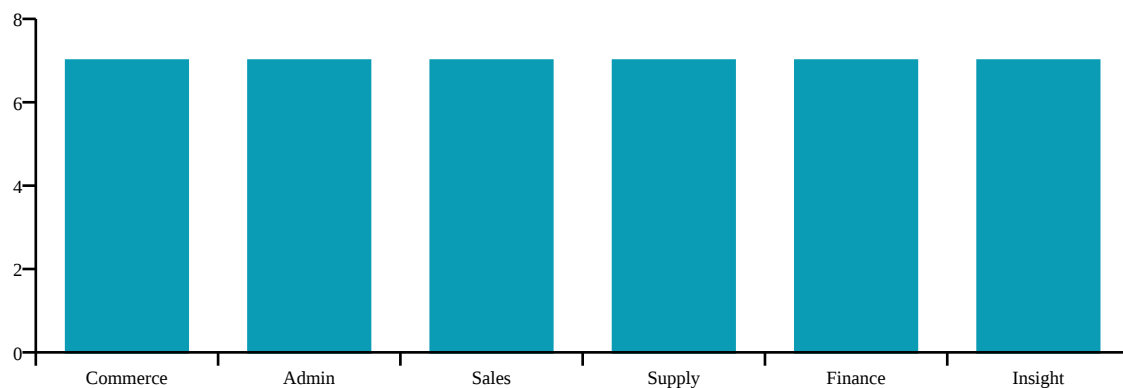

- Shipment tracking
- Sales returns
- GST management
- Expenses
- Salary & payroll
- Staff management
- Business settings

36-42 Insight, Safety & Workflow

- Reports & analytics
- PDF, printing & exports
- Activity & audit log
- Transaction safety
- Operational workflows
- Operating controls
- Complete business coverage

Functional coverage by area

Daily operations made simpler

The platform keeps operational references connected so stock, ledgers, payments and fulfilment remain traceable from the original transaction.

Fast counter billing

Search customer by contact number, add products live, validate stock, calculate discounts/GST, show previous balance separately, record payment and print the invoice.

Smart product catalogue

Each variant can keep its own SKU, image, selling price, purchase cost, GST and stock while remaining grouped for customer-friendly colour/variant selection.

Purchasing & supplier control

Create draft purchase orders, receive stock partially or fully, update inventory automatically and maintain supplier liabilities and payments against purchase references.

Customer & supplier ledgers

Running balances, debit/credit entries, references, filters and PDF/Excel exports help businesses review outstanding amounts.

Packaging & dispatch

Create multiple boxes, capture weight/dimensions, print A4 or 100 x 150 mm thermal labels, add courier/transport information and update tracking events.

Reports & analytics

Sales, purchases, outstanding balances, stock movement, low stock, top products, GST, expenses, payroll, dispatch and user activity reporting.

Three core workflows - connected end to end

CUSTOMER ORDER

Discover -> login -> variant -> cart -> order -> acceptance -> billing -> packaging -> dispatch -> tracking.

PURCHASE & SUPPLIER

Low stock -> purchase order -> partial/full receipt -> inventory update -> supplier ledger -> payment -> GST/reporting.

DIRECT BILLING

Customer lookup -> product search -> stock validation -> GST/discount -> payment -> invoice -> stock movement -> ledger.

Business signals at a glance

ORDER FLOW
Tracked

Accepted to delivered

Reliable by design. Ready for counter, office and warehouse.

Transaction safeguards

- Server-side validation for critical forms.
- Database transactions and rollback for multi-record financial/stock operations.
- Stock checks before billing and order acceptance.
- Invoice/PO reference validation for payments.
- Linked-record safeguards and consistent ledger balances.
- Role-based access and customer ownership checks.

Traceability & audit

- User, event type and module recorded.
- Human-readable activity description.
- Related record ID/type, date/time and metadata.
- IP/user-agent information where recorded.
- Activity coverage across billing, purchases, stock, dispatch, settings, expenses and payroll.
- Daily activity graph for operational review.

Print, PDF and Excel support

A4 / PDF

Orders • Sales invoices • Purchase orders • Customer/supplier ledgers
• Low-stock reports • Receipts/vouchers • Box labels

Thermal

Sales invoices • Payment receipts/vouchers • 100 x 150 mm box labels for packaging and dispatch

Excel

Customer ledger export • Supplier ledger export • Predefined product-import template

Simple subscription pricing

AFFORDABLE SUBSCRIPTION

VyapaarGo is fully subscription based, helping businesses start with a lower software cost instead of a large one-time software purchase.

SEPARATE SERVICE CHARGES

Hosting, domain, SSL and development/customisation charges are separate from the software subscription.

GST & COMMERCIAL TERMS

GST is applicable on all charges. For detailed pricing, commercial discussion and negotiation, please contact Software Samadhan.

FOR DEMO, NEGOTIATION & DETAILED PRICE - CONTACT US

Tell us your business workflow and requirements. We will discuss the suitable subscription and applicable implementation services.
